JAVA ASSIGNMENT 03

Q1.

CODE:

```
class Question1 {
    public static void main(String[] args) {
        String str = "Java Exercises!";
        System.out.println("Original String = " + str);
        System.out.println("The character at position 0 is " + str.charAt(0));
        System.out.println("The character at position 10 is " +
str.charAt(10));
    }
}
```

OUTPUT:

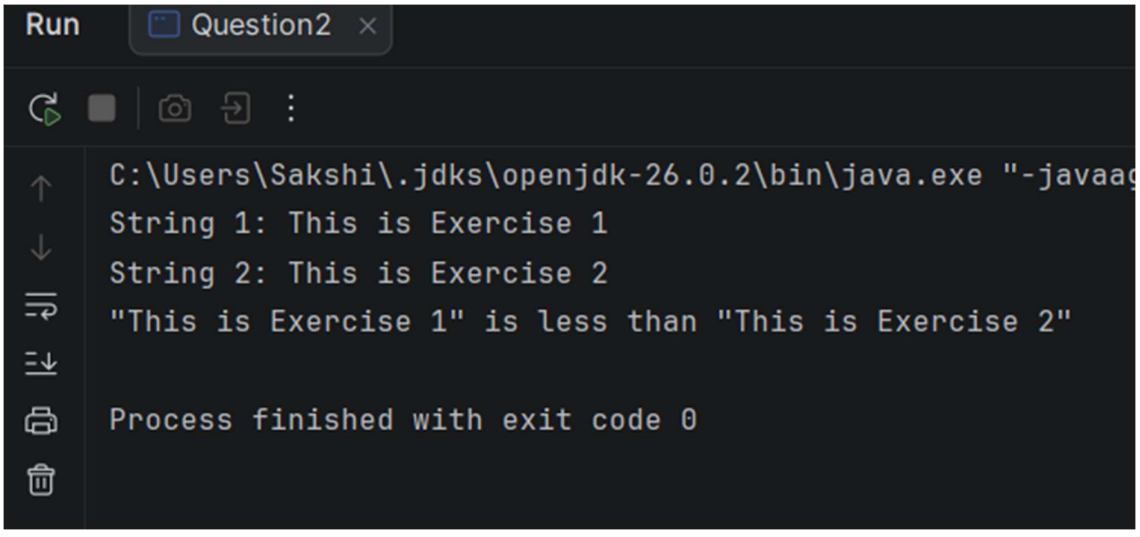

Q2.

CODE:

```
class Question2 {
    public static void main(String[] args) {
```

```
        String str1 = "This is Exercise 1";
        String str2 = "This is Exercise 2";
        System.out.println("String 1: " + str1);
        System.out.println("String 2: " + str2);
        int result = str1.compareTo(str2);
        if (result == 0) {
            System.out.println("\"" + str1 + "\" is equal to \"" + str2 + "\"");
        }
        else if (result < 0) {
            System.out.println("\"" + str1 + "\" is less than \"" + str2 + "\"");
        }
        else {
            System.out.println("\"" + str1 + "\" is greater than \"" + str2 + "\"");
        }
    }
}
```

OUTPUT:

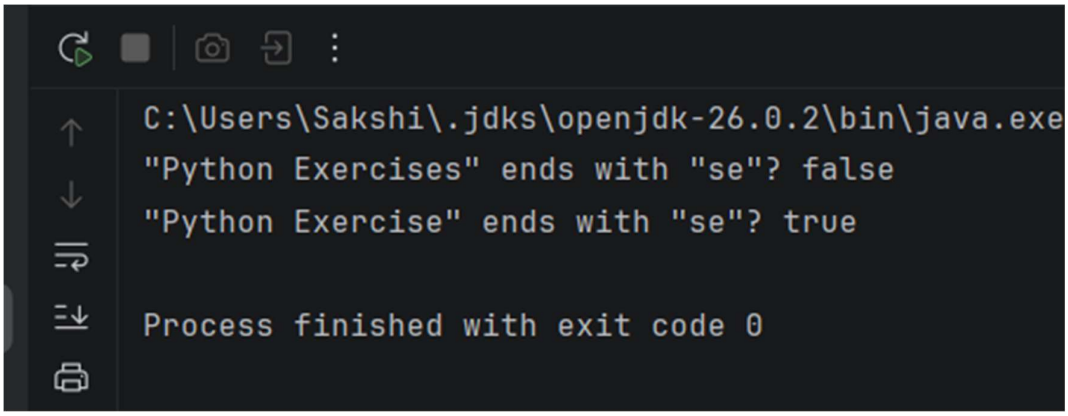

Q3.

CODE:

```
class Question3 {
    public static void main(String[] args) {
        String str1 = "Python Exercises";
        String str2 = "Python Exercise";
        System.out.println("\"" + str1 + "\" ends with \"se\"? " +
str1.endsWith("se"));
        System.out.println("\"" + str2 + "\" ends with \"se\"? " +
str2.endsWith("se"));
    }
}
```

OUTPUT:

Q4.

CODE:

```
class Question4 {
    public static void main(String[] args) {
        String str = "The quick brown fox jumps over the lazy dog.";
        for (char ch = 'a'; ch <= 'z'; ch++) {
            System.out.print(ch + " ");
        }
        System.out.println();
        System.out.println("==========================");
        for (char ch = 'a'; ch <= 'z'; ch++) {
```

```
            System.out.print(str.indexOf(ch) + " ");
        }
        System.out.println();
    }
}
```

OUTPUT:

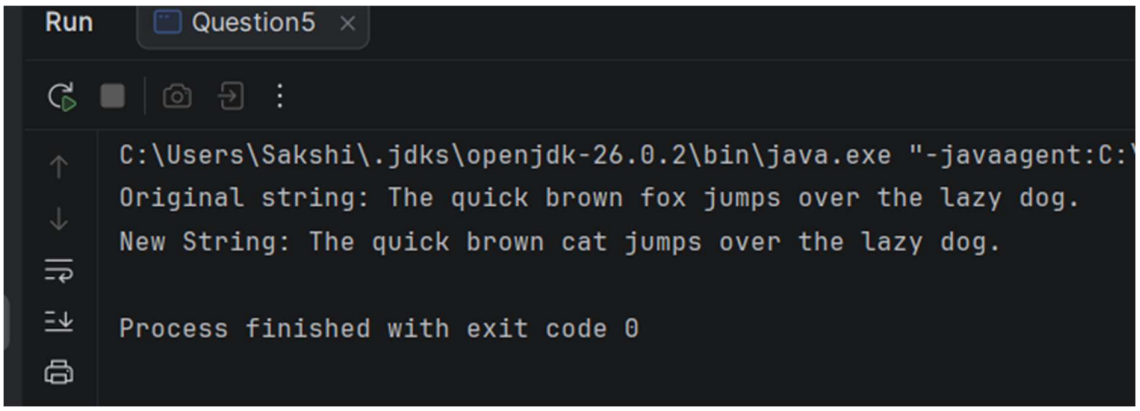

Q5.

CODE:

```
class Question5 {
    public static void main(String[] args) {
        String str = "The quick brown fox jumps over the lazy dog.";
        System.out.println("Original string: " + str);
        String newStr = str.replace("fox", "cat");
        System.out.println("New String: " + newStr);
    }
}
```

OUTPUT:

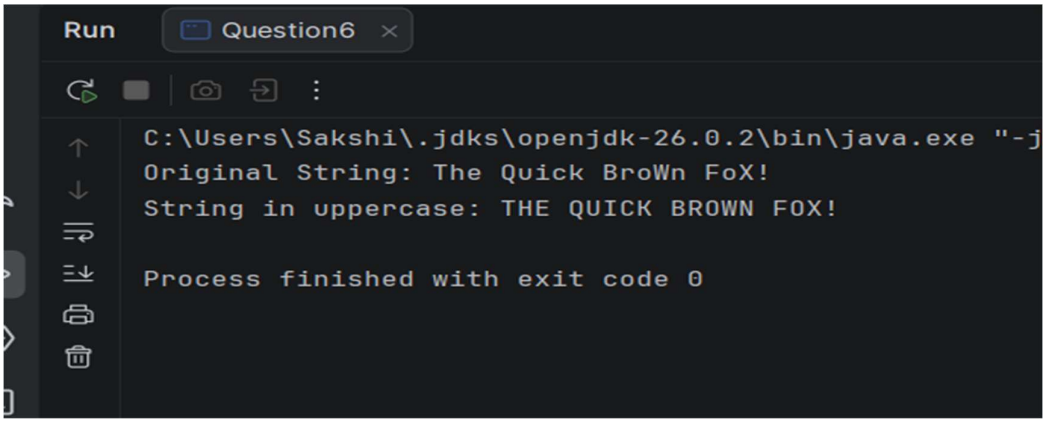

Q6.

CODE:

```
class Question6 {
    public static void main(String[] args) {
        String str = "The Quick BroWn FoX!";
        System.out.println("Original String: " + str);
        String upper = str.toUpperCase();
        System.out.println("String in uppercase: " + upper);
    }
}
```

OUTPUT:

Q7.

CODE:

```
class Question7 {
    public static void main(String[] args) {
        String str = "The quick brown fox jumps";
        System.out.println("The given string is: " + str);
        String reverse = "";
        for (int i = str.length() - 1; i >= 0; i--) {
            reverse = reverse + str.charAt(i);
        }
        System.out.println("The string in reverse order is:");
        System.out.println(reverse);
    }
}
```

OUTPUT:
